

Stiftung Experimentelle Biomedizin

Symposium 2025

Thursday 23rd October 2:00 pm -6:30 pm

Friday 24th October 9:30 am- 1:30 pm

Main seminar room, Institute of Oncology Research,
via Francesco Chiesa 5, 6500 Bellinzona

Chris Marine

VIB-KU Leuven, Belgium

Studying melanoma evolution and therapy resistance one cell at the time

Alpaslan Tasdogan Laureate 2021/2022

ZMB Essen, Germany

Targeting metabolic liabilities in cancer

Arianna Baggolini Laureate 2023/2024

IOR, Bellinzona, Switzerland

Studying melanoma evolution and therapy resistance one cell at the time

Daniela Kramer Laureate 2019/2020

University Mainz, Germany

Tumor-derived I κ B ζ expression shapes therapy responses in melanoma

Christoph Schlapbach Laureate 2014/2015

University Hospital Bern, Switzerland

The aryl hydrocarbon receptor regulates T cell metabolism in skin inflammation

Mirjam Schenk Laureate 2014/2015

University Hospital Bern, Switzerland

Discovering Novel Mechanisms of Immune Regulation Using High-Dimensional Data

Ilaria Malanchi

Francis Crick Institute, London, UK

Emergency granulopoiesis in cancer progression

Arianna Calcinotto Laureate 2020/2021

IOR, Bellinzona, Switzerland

Unlocking immunity: the role of neutrophils in BRCA-driven cancer initiation

Christoph Schneider Laureate 20218/2019

University of Zurich, Switzerland

Epithelium–myeloid cell crosstalk in the lung

Stephanie Ganai Vonarburg Laureate

2018/2019

University of Bern, Switzerland

Diet-microbiota-host interactions in early life

Michael Scharl Laureate 2016/2017

University of Zurich, Switzerland

The microbiome as therapy for cancer

Florian Sturm

Journalist, Laureate of the Investigation Award

Chasing Impact: How the Race to Publish Warps Science
